

PARTNERSHIP VALUES

COMMUNITY

N-TUTORR's success has depended on the strength of commitment to working as a community. Together, partners have achieved targets and produced impacts that would have been challenging in isolation within the relatively short timeframe of the programme.

COLLABORATION

N-TUTORR provided new ways for staff (professional services and academic) and students to work collaboratively in programmes, in diverse institutional contexts and across the partnership.

TRUST

The partners have developed new levels of trust at both inter and intra institutional levels. This was exemplified by the leadership approach of the partner Presidents Students were recognised as trusted, valued partners across all work-streams.

OPENNESS

The partners have developed an open, trusted approach to working together. The programme released a range of openly licensed resources, demonstrating a commitment to shared knowledge.

DIVERSITY

The programme respected the unique characteristics of each partner institution while collaboratively developing shared sector-wide approaches. The programme celebrated diversity as a strength, creating resources that reflected a new sectoral collective ethos.
